Whether you are planning to upgrade your dental practice with latest technology or you are just about to start your professional career: iOptima<sup>INT</sup> is the All-in-One solution offering you the full range of treatment options seamlessly integrated into your dental chair. No need for additional equipment anymore: iOptima<sup>INT</sup> lets you perform your restorative procedures, endo treatments (incl. reciprocating mode) and surgical procedures incl. implant placement. A Piezo scaling function is included as well.

Installed directly into the existing dental unit, the system is easily controlled through an Apple® tablet. The iOptima<sup>INT</sup> therefore requires minimal space and guarantees a perfectly functional working environment.

Discover the iOptima<sup>INT</sup>, the All-in-One solution for general dentists.

limitless  
versatility

# All-in-One

Make your life easier with Bien-Air Dental's All-in-One system. Highly versatile, the iOptima<sup>INT</sup> enables you to perform most of your dental procedures.

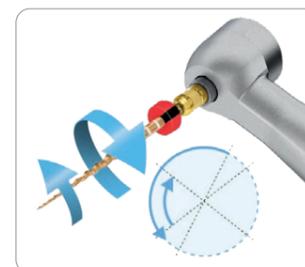

Fully integrated into your dental unit, the iOptima<sup>INT</sup> system guarantees optimal space savings and ensures that your working environment is fully operational.

The iOptima<sup>INT</sup> is an All-in-One solution, saving space and money.

## Endodontics

Coupled to the iOptima<sup>INT</sup> and the MX2 micromotor, the new Bien-Air Dental CA ENDO contra-angle has been specially designed for root canal treatment in continuous as well as reciprocating mode. It is therefore fully compatible with standard endodontic files as well as WaveOne Gold files by Dentsply Sirona Inc. and RECIPROC files by VDW. In addition, its small head ensures optimal handling and improved visibility of the surgical field.

## WaveOne® Gold | RECIPROC®

Make your root canal treatments procedures simpler with the WaveOne Gold (Dentsply Sirona Inc.) and RECIPROC (VDW®) reciprocating modes. Thanks to the reciprocating movements, the file respects the original root canal anatomy and reduces the risk of instrument fracture. Your endodontic procedures become safer and faster.

The WaveOne® Gold and RECIPROC® features are optional. In order to unlock these features, please contact Bien-Air UK Limited at +44 (0)1293 550 200 and order your starter-kit (REF 1700733-001).

NEW CA ENDO by Bien-Air

## Restorative procedures

Thanks to its multiple advantages, the combination of the iOptima<sup>INT</sup>, MX2 micromotor and EVO.15 1:5 contra-angle allows you to carry out all your restorative work, from cavity preparation to finishing and polishing your filling.

With advanced electronic management, the MX2 micromotor is extremely stable and powerful, even at low speed. Combined with the EVO.15 1:5's revolutionary file chuck system, this micromotor / contra-angle set ensures vibration-free procedures with unmatched accuracy.

A slowspeed contra-angle (1:1) is not needed anymore!

MX2 + EVO.15 1:5 L\*

## Oral surgery & implantology\*\*

Driven by the iOptima<sup>INT</sup>, the MX-i micromotor combined with the CA 20:1 contra-angle offer you the best technology for all your surgical procedures.

While the MX-i's high torque will overcome all your implant procedures, the CA 20:1's internal irrigation system will help you avoid discomfort when handling the instrument.

MX-i + CA 20:1 L\*

Built directly into the dental unit, the iOptima<sup>INT</sup> system can be controlled either using an iPod touch or an iPad mini. The refined simplicity and user-friendliness of these tablets will enable you to focus on what matters the most: your patient.

In addition, the numerous pre-set and customizable protocols of the iOptima<sup>INT</sup> App will make your procedures considerably easier. Let us guide you!
